Experience

- **Meta CraftLab** **Mumbai | Maharashtra**
  Full Stack Developer Intern *Summer'24*
  Collaborated in building </devstar>, a Meta CraftLab product that helps developers in increasing their productivity providing different dev tools in one place. Also received an LoR for my work during the internship.

- **National Institute of Electronics and Information Technology - (NIELIT)** **Remote**
  IoT and Data Analysis Intern *June'24 – July'24*
  Implemented hour glass architecture and built an IoT based smart garden automation and monitoring system using ESP32 board and different sensor and components.

- **Google Developers Student Club – IKGPTU** **Jalandhar | Punjab**
  Core Team Member *August'23 – August'24*
  During my time in the GDSC, I had a chance to collaborate on front-end projects with my team mates also help in organizing and participating in workshops and events. I significantly enhanced my technical and interpersonal skills and reinforced my passion for community building.

Projects

- **PDF-2-Scan** **Live** | **GitHub**
  PDF-2-Scan is a development tool that is part of </devstar> that scans your .pdf to refine the content and improve pdf quality. Advanced options involve filter adjustment with immediate feedbacks and results.

- **Portfolio Website** **Live** | **GitHub**
  A personal portfolio to showcase my work. Made with modern technologies utilizing lighting fast loading time and Next.js

- **ETHEREAL** **GitHub**
  A full-stack web social media app that lets users upload, preview and post their favourite pictures.

Education

- **I.K. Gujral Punjab Technical University** (5th Semester) **Jalandhar | Punjab**
  Bachelors in Technology – Computer Science and Engineering *2022-2026*
  Current sGPA – 8.0 (3rd Semester)
